PROFILE

Final-year Honours student in Computing Science (Enterprise Software Development) at the University of Technology Sydney, graduating May 2027, with a distinction average and a 6.9/7.0 GPA from the IT Diploma program. I build production software, engage directly with clients, and think commercially about technology. My work spans full-stack development, requirements gathering and delivery for real clients, AI-assisted engineering, and early-stage startup building. I am interested in roles that sit at the intersection of technology and business outcomes - software engineering, technology consulting, business analysis, and product development.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, SQL, HTML/CSS, C++
Frameworks	Django 6, Wagtail CMS, Django REST Framework, REST APIs, MVC Architecture, Tailwind CSS
Databases	PostgreSQL (production), SQLite, DBeaver - schema design, raw SQL, migrations, bulk operations
Infrastructure	Docker, Railway, Gunicorn, Whitenoise, Azure DevOps CI/CD, environment-based config
AI Tools	Claude Code, OpenAI Codex, GitHub Copilot - daily use for development, architecture, and documentation
Product & BA	Requirements gathering, user stories, acceptance criteria, Figma prototyping, stakeholder management, process mapping
Testing	JUnit, test case design, defect logging, bug reproduction and verification
Productivity	MS Office Suite (Word, Excel, PowerPoint, Outlook), Google Workspace, Figma, Notion, Git/GitHub

EDUCATION

Bachelor of Computing Science (Honours) - Enterprise Software Development <i>University of Technology Sydney Ultimo, NSW</i> - Distinction average across all coursework subjects - Undertaking Honours research component alongside final year - Relevant coursework: Software Development Studio, Requirements Engineering, Agile Project Management, Data Systems	Feb 2024 - May 2027
Diploma in Information Technology (Accelerated) <i>University of Technology Sydney Jakarta, Indonesia</i> GPA: 6.9 / 7.0 - Dean's List both semesters	Jun 2023 - Jan 2024

PROJECTS

CAWC NSW Website Live Client Project cambodian-welfare.up.railway.app <i>Lead Developer and Client Liaison, Team of 3 Django 6, PostgreSQL, JavaScript, Stripe, Docker, Railway github.com/jo-nuel/cambodian-australian-welfare-web</i> Delivered a fully live production platform for the Cambodian Australian Welfare Council of NSW - 11 Django app modules, bilingual EN/Khmer interface, live Stripe payment processing (one-time and recurring), a double opt-in	Mar 2026 - Current
--	--------------------

email subscription system, and a keyword-matching FAQ chatbot in vanilla JavaScript. Serving 500+ community members across 7 programs.

- Led the full product lifecycle - stakeholder interviews, requirements gathering, Figma prototyping with client iteration, user story writing, technical development, testing, and handover documentation enabling non-technical staff to manage the platform independently through Wagtail CMS.
- Configured production deployment with Docker, Railway, PostgreSQL, Gunicorn, and Whitenoise. Authored DEPLOYMENT.md covering full stack configuration for handover. Public codebase: github.com/jo-nuel/cambodian-australian-welfare-web

SettleUp | Variable-Usage Billing Engine | Deployed, Active Development

2026 - Current

Co-Founder and Backend Developer, Team of 2 | Python, Django, Django REST Framework, SQLite, Railway

- Building a vertical SaaS billing engine for service businesses - deployed on Railway and actively developed into a real business. Initial vertical is the skip bin and waste services industry. I own all backend development including billing logic, DRF API design, and deployment configuration.
- Implemented a MockPaymentProvider layer simulating Pinch payment rails for realistic pre-integration testing. Defined the business case, identified the target vertical, and scoped the product requirements from scratch.

Opal Card Management System

Aug 2024 - Oct 2024

University of Technology Sydney | Java, Maven, REST APIs, Azure DevOps

- Payment card management system in Java/Maven with REST API integration, parameterised SQL, multi-layer authentication, and Azure DevOps CI/CD pipelines in an Agile cross-functional team.

IoT Device Catalogue

Mar 2024 - May 2024

University of Technology Sydney | Java, MVC, SQL, JUnit

- Full-stack Java application with SOLID principles, MVC architecture, role-based access control, normalised SQL schema design, comprehensive JUnit test suite, and formal defect logs through to verified resolution.

EMPLOYMENT

Logistics Assistant

Sep 2025 - Present

David Jones | Sydney, NSW

- Inventory management, data accuracy, and stock coordination across a high-volume retail operation. Systematic discrepancy resolution and cross-team communication in a fast-paced commercial environment.

Proactive Team Member

May 2024 - Aug 2025

Woolworths | Marrickville & Mascot, NSW

- Customer-facing operations across store sections in a fast-paced team environment.

ADDITIONAL INFORMATION

Languages	Fluent English and Indonesian - bilingual cross-cultural communication across Indonesian and Australian professional contexts
Work Rights	Indonesian national - Australian Student Visa (Subclass 500); full work rights during semester breaks and university holidays
Interests	Technology consulting, enterprise AI applications, Indonesia-Australia commercial markets, product development, early-stage startups
Availability	Part-time during semester (48 hrs/fortnight); full-time during university breaks
